

ANNEX II

Critical raw materials

Section 1

List of critical raw materials

The following raw materials shall be considered critical:

- (a) antimony
- (b) arsenic
- (c) bauxite/alumina/aluminium
- (d) baryte
- (e) beryllium
- (f) bismuth
- (g) boron
- (h) cobalt
- (i) coking coal
- (j) copper
- (k) feldspar
- (l) fluorspar
- (m) gallium
- (n) germanium
- (o) hafnium
- (p) helium
- (q) heavy rare earth elements
- (r) light rare earth elements
- (s) lithium
- (t) magnesium
- (u) manganese
- (v) graphite
- (w) nickel — battery grade
- (x) niobium
- (y) phosphate rock
- (z) phosphorus
- (aa) platinum group metals
- (ab) scandium
- (ac) silicon metal
- (ad) strontium
- (ae) tantalum
- (af) titanium metal
- (ag) tungsten
- (ah) vanadium.
