

## Twin Idea Camp on Business Models and Technologies for Circular Industry

18 October 2016 | 10:00 p.m. - 17:00 p.m.  
Antwerp (Belgium) and Espoo (Finland)

VITO and EIT RawMaterials invite you to participate in a twin event to trigger and share your ideas about innovation for circular industry. In two simultaneous and connected idea camps we will explore new business concepts and innovative technologies to support circularity in the raw materials industry.

Choose your topic and decide where you want to participate:

**Antwerp** (Belgium): Which technological breakthroughs can bring innovation to recycling?

**Espoo** (Finland): How to make money from better management of materials and residues?

Prepare your idea now and participate in our **idea pitching sessions**:

- Students: Present your recent Master thesis (2015 or 2016) and win the Student Award
- EIT RawMaterials partners: Present your innovative technology or business approach and initiate new KAVA activities
- Start-ups and SMEs: Present your business and get endorsed by an EIT RawMaterials partner

*We are especially looking for ideas in the fields of:*

- Innovative separation and recycling technologies
- Upcycling concepts for complex materials
- High value secondary products
- Waste collection concepts and systems
- Going circular: strategies for implementation
- Business concepts to generate profit from residues

We specifically invite EIT RawMaterials partners to pass this call on to their recently graduated students and to entrepreneurs which they want to endorse.

Presenters get the opportunity to have a 5 minutes pitch of their innovative idea. Send your proposal, as a 10 lines text to [ideacamp2016@vito.be](mailto:ideacamp2016@vito.be) before **Thursday 15 September, 12:00 CET**.

Participants will get a prime view of new ideas in the field and the chance to build collaborations for new KAVA activities.
