

## **Networks of Infrastructure at EIT RawMaterials**

*Workshop on Framework Model Design and Collaboration Activities*

*October, 4-5<sup>th</sup> 2016, Berlin*

*Networks of Infrastructures play a key role in fostering collaboration between partners of EIT RawMaterials and external customers. Coordinators, with deep knowledge of expertise and infrastructure of their partners, can support in building up new KAVA activities, outreaching and communication. To do so, an essential prerequisite is to know each other better and to identify synergies as well as gaps along the value chain.*

*The aim of the workshop is to develop a common understanding of the role of Nols, set-up a suitable service portfolio for partners and customers and to join forces on mapping existing infrastructure and know-how. Finally, this will lead to a communication strategy that we would like to set-up together with all of you.*

**Meeting venue:** Berlin,

Follow this link for maps:

### **Participants:**

- All Coordinators from Nols starting 2016 and 2017 (tbd)
- CLC Managers, Business Developers and Thematic Officers, Head of Communications
- CTO and COO of EIT RawMaterials

Please register before September 20<sup>th</sup> at: [lyyti-link](#)

*Please note: This workshop will be organized in parallel to the project reviews – Exact timing for your project review will be communicated in due time*

### **Hotel recommendations:**

**Preparation:** For the poster session each coordinator is asked to prepare a small poster (A3) highlighting the following information: no template

- Focus themes
- Partners – expertise and type of infrastructure
- Vision of Nol for following years: how could it look like and contribute to success of EIT RawMaterials?
- Ongoing activities and next steps
